

Ford Blue Advantage™ FBA+ Overview

Blue
Advantage

Updated as of June 2026. Any updates communicated via dealer communication on FMCD dealer after this date take precedent.

FBA+ Overview

Please see the Operations Guide for more details.

FBA+

Dealers an opportunity to add a basic maintenance plan with enhanced reimbursement (\$90 per visit gas/hybrid, \$170 per visit diesel) to FBA vehicles (FBA+). FBA+ is designed to drive Dealer VIN share and incremental parts and labor profit.

Program Details

- Dealers can choose to opt-in all eligible inventory via CPO website (cpo.dealerconnection.com) beginning 3/16/26
 - Only eligible for vehicles with an actual sale date on or after enrollment
- During opt-in, Dealers can choose to add FBA+ to Gold certifications, Ford make Blue certifications, non-Ford make Blue certifications, or any combination thereof
 - EV Certified units are not eligible for FBA+
- Dealers choose to participate in FBA+ by certification level (not a la carte by VIN)
- FBA+ includes 2 Year/24,000 Mile Fixed Reimbursement Maintenance Plan added to FBA Certification
- Customers receive 2 visits (recommended 10K mile interval). Visits include Engine Oil and Oil Filter Change, Multi-Point Inspection, and Tire Rotations.
- Dealer reimbursement (via ESP claim) is \$90 per visit (gas/hybrid vehicles) x 2 visits = \$180 total reimbursement or \$170 per visit (diesel vehicles) x 2 visits = \$340 total reimbursement
- Dealer cost is \$140 per unit added to FBA Certification for gas / hybrid and \$260 per unit added to FBA Certification for Diesel vehicles.

Once enrolled and certification levels are opted-in, all eligible vehicles with an actual sale date, not report date, on or beyond your enrollment date will include the basic maintenance plan and will be charged the incremental cost for FBA+ (\$140 for gas/hybrid and \$260 for diesel).

Action Required at Time of Vehicle Sale:

Complete the Ford Protect Maintenance Application for Contract* (FPLP 8324 MNTC (OCT 23))

- a) Check the box for Basic Plan Normal Schedule
- b) Indicate the plan is for 2 years/24,000 miles
- c) Use **\$0** as the purchase price

*Note: The Ford Protect Application for Contract is available via Dealer eStore.

1. Place copies of the contract in the deal jacket.
2. DO NOT reflect a charge for the complimentary Maintenance Plan on the finance contract.
3. DO NOT send a copy of the service contract along with the finance contract to Ford Credit.
4. DO NOT register the Ford or Lincoln Protect contract in the Extended Service Plan System (ESPS) or the Ford-Lincoln Protect Portal (FLPP). **Ford or Lincoln Motor Company will register the complimentary FBA or Lincoln CPO Maintenance Plan** with enhanced reimbursement (\$90 per visit gas/hybrid and \$170 per visit diesel) once the vehicle is reported sold through FBA or Lincoln CPO Program Headquarters.

FBA+ Upgrade Registration Process:

1. FBA+ Maintenance upgrades can only be purchased that are of greater cost/time/mileage/frequency of maintenance intervals than the underlying FBA+ maintenance plan.
2. It is not possible to downgrade the maintenance plan or upgrade to any plan besides a maintenance plan (i.e. PMP can NOT be upgraded to a core contract).
3. Upgrades from FBA+ Maintenance plans will receive \$140 credit for gas/hybrid and \$260 credit for Diesel.

Please see the following page for instructions on how to register upgrades.

FBA+ Overview

Please see the Operations Guide for more details.

FBA+

To Register the Upgrade in the Ford-Lincoln Protect Portal (FLPP):

1. Begin the Quote/Registration process by entering a VIN, Signature Date, Warranty Start Date, Odometer, and correct Vehicle Usage.
2. On Step 2, select 'MAINTENANCE' Product Type and look for the following Plans:

- Limited Maintenance – 5k Interval – Discount Eligible Upgrade
- Limited Maintenance – 7.5k Interval – Discount Eligible Upgrade
- Limited Maintenance – 10k Interval – Discount Eligible Upgrade
- Premium Maintenance – 5k Interval – Discount Eligible Upgrade
- Premium Maintenance – 7.5k Interval – Discount Eligible Upgrade
- Premium Maintenance – 10k Interval – Discount Eligible Upgrade

Select the appropriate plan and complete the remaining registration process as you normally would.

3. The plan price that you will see on Step 2 will NOT reflect the credit that you will receive for the promotional plan (i.e., you will see the full retail price).To determine the discounted price, you will need to subtract the value of the FBA plan from the retail price that you see in FLPP. Upon registration, ESPS will discount the cost of the plan by the value of the FBA underlying plan, and you will see the net dealer cost charged on your Dealer Daily Register (DDR).
4. The upgrade plan will NOT register until the promotional plan is registered to the VIN If the plan is submitted for registration in FLPP before the promotional plan is registered, the contract will appear in your Action Needed queue with Error "E071 - CANNOT REGISTER CONTRACT UNTIL ONE WITH REQUIRED PLAN EXISTS". FLPP will automatically attempt to register the contract for you when the promotional plan is registered.

To Register the Upgrade in ESPS:

1. Once the underlying FBA+ is listed on your Dealer Daily Register (DDR), this will illustrate that the contract has been registered to that vehicle.
2. At this point, register the upgrade contract sold by selecting the "Contract Registration" function from the ESPS Dealer Menu.
3. When entering the contract in ESPS, enter the ACTUAL purchase price the customer paid for the coverage.
4. To enter the upgraded contract, use the plan codes below
5. The credit for the underlying FBA+ will be applied to the total dealer cost of the upgraded contract with the dealer being charged the difference.
